US media censor uranium weapons stories

Depleted uranium turns to poison gas

By Bob Nichols

Project Censored Award Winner and Online Journal Contributing Writer

May 27, 2005—A dedication in 2120 might say: Dedicated to the memory of the Iraqi people. Many people believe Iraq was the birthplace of civilization some 5,000 years ago. Iraq was destroyed and radioactively contaminated in an early 21st Century Oil War by a fascist world power, now extinguished.

Dedication to the Iraqi People in 2005: Iraq is uninhabitable. The wars in Central Asia all were nuclear wars fought with radiation-dispersing American weapons.

None of the Bushista NeoCons running this miserable genocide in Central Asia care one whit. In fact, it is what they ordered from the US military's list of services. Mostly, the remaining 300 million "good Americans" do not care, do not know and do not want to know.

Those Iraqis not yet radiologically contaminated must leave Iraq as soon as possible. Before they too get radiation poisoning, their genetic line is kaput, they die and become just so much radioactive sand in the deserts of Iraq.

The only hope of the US-UK troops in Iraq is that they get out before they take a fateful breath in the wrong place, at the wrong time. The not yet dead say there is a very slight metallic taste at the time.

Meanwhile the 140,000-pound A1M1 Death Machine Tanks keep dispensing Poison Uranium Oxide Gas that lasts forever in the Occupied Territories of Iraq, as per the Bushista NeoCons' instructions.

That's the bottom line. The US military, funded by the US taxpayer who borrowed up to 80 percent of the world's savings at one time, killed the Iraqi people. The Iraqis don't even know it yet. Most scientists and just plain people are afraid to look them in the eye and tell them the truth.

Censorship at Work

(America, Land of War Criminals) Radiation poisoning is a miserable way to die. It means adult diapers, unbearable and unimaginable pain and morphine as a goddess, if you can get it. Poisonous, radioactive, ceramic uranium oxide gas colors everything else. There is no treatment and there is no cure.

Radiation poisoning is a death sentence, courtesy of the US Political Class delivered on target and on time by the US military, the most lethal military in the history of the world. .

See for yourself how people are faring in the shadowy world of government censorship, lies payola and grim everyday officially sanctioned propaganda. You and your family are subject to these NeoCon lies daily. If you are an American, chances are you believe them. You are wrong, dead wrong. You could not possibly be *more* wrong.

Google these phrases at www.google.com:

[depleted uranium](#)

On May 14, 2005, it received 971,000 Internet page hits. Lie: "Depleted Uranium is really OK! After all, the Pentagon would not call it depleted if it wasn't, would they?"

["ceramic uranium oxide gas" + battlefield](#)

Truth: This stuff is deadly. It is Bad, Radioactive and Kills people—forever. It is not okay a year from now. It is not okay, ever. Its use is always a war crime. Only 19 Google Net page hits.

May 14, 2005, the Google count was a minuscule 19 Hits. It's on fewer than 19 websites. Nineteen is hardly any at all. That's it! Total for the world as reflected by Google. But, still, I'm right and you are wrong.

Again, that's 971,000 vs 19 hits. That's a totally overwhelming advantage. Yet, the US military and intelligence agencies keep investing more and more resources and money to counter the miserable little 19 stories, articles and references to the genocidal product "ceramic uranium oxide gas" used by the US military in Bosnia, the former Yugoslavia, Afghanistan and Iraq—in other words, Central Asia.

Why are they worried? In the world of "Big Media" what effect can a mere 19 articles have against the Tsunami of 971,000 page hits? Well, a lot, actually.

Now Google the phrase [Zyklon B](#) That is the poison gas the Nazis used to kill millions of concentration camp victims during the Holocaust of World War II. WW II lasted from 1939 to 1945.

You see, the United States Political Senior Class joyfully joined, 60 years later, the German Nazis of World War II in the decision to use genocide as an official government policy (OGP.) This was not done by mistake. No, these modern day butchers knew exactly what they were doing.

What's genocide? [Dictionary.com](#) defines it as: The systematic and planned extermination of an entire national, racial, political, or ethnic group.

Weaponized Ceramic Uranium Oxide Gas betrays the motives of its users in the US military and its advocates in politics, government and society. Just as surely as the Nazi's poisonous hydrogen cyanide gas does for an impartial war crimes investigator.

Genocide is the kind of international crime that has a big downside, if knowledge of it gets out of a tightly controlled orbit of enthusiastic and dedicated cult-like supporters. Of course, the CIA can easily control the big media to manage the spin. It's pretty simple, they do so every day. William Colby, former director of the Central Intelligence Agency, once stated "The CIA owns anybody of consequence in the national media." It is obvious on its face.

Folks, the CIA cannot control you, though: Tell your neighbors about the US military's Kill Everything Uranium Weapons.

It's known unofficially as the "Kill'em All Policy." also: "Waste Them," "Whack Them," and "Nuke 'em." Once set free in the political environment that is the kind of searing truth that burns out corruption: the infection, pus, and bloody raw wounds of a democracy turned fascist.

Currently in the deepest, darkest, blackest part of the fascist theocratic government in the United States, the slavishly obedient US military sees little reason to revolt and say "No!" to the well-known genocidal policies of the senior politicians. Even though poisonous uranium gas sickens and kills their own troops, the officer corps goes along with it as necessary because the civilian political leadership wants it that way.

It is also, as a practical matter, an efficient method for eliminating ailing vets that cost billions of dollars in budgetary appropriations for the Veterans Administration. They are just following the advice of US foreign policy guru Henry Kissinger.

In 1973, in General Alexander Haig's presence, then National Security Advisor Henry Kissinger, referred pointedly to military men as "dumb, stupid animals to be used" as pawns for foreign policy.[10] Kissinger set the public stage for the war managers to sacrifice the gullible, but patriotic and "stupid," American troops to the use of weaponized uranium oxide gas. American General Norman Schwarzkopf from the First Gulf War stated they were not told anything about harmful uranium munitions.

As seen in the overwhelming comparison of 971,000 articles to 19 articles, the "depleted uranium" metal the US military and government actively encourages the meek and submissive academic sector to study is most often called "mildly radioactive." The same metal in most of the rest of the world is "highly radioactive."

The "big media's talking heads" simply do as they are told, read what they are handed and collect their millions in payola bribes; and, of course, they smile—a lot.

In short, the lying big media have you and your family controlled perfectly. That makes the Professional Hairdo News Readers on your tube guilty of being accessories to genocide and accessories to mass murder.

These media celebrities should utterly disgust everyday Americans, anywhere, anytime. Wait just a few minutes and everywhere in America, you will see their bright shiny faces on the boob tube. The men are strong, confident and well fed. The women look gaunt, anorexic and coping.

In the ivy covered halls of academia, the US government has thousands of frightened scientists busy studying the wrong radioactive metal, on purpose. The War on Central Asia is a large well-organized industrial killing operation. God forbid the overeducated, worthless clowns should study the poison uranium gas that is actually crippling and killing our own troops on the ground in Iraq, and Iraqi men, women and children.

Yes, you see: poisonous radioactive ceramic uranium oxide gas and dust is altogether different from the elemental uranium block of metal from which the more lethal version is derived.

This metal [uranium] humbly makes itself available for the having, by anyone with the gumption to dig it out of the ground and "process" it one time. No big deal, eh? Your watch dial might even glow with a cousin metal. It has a pretty, soft glow, doesn't it?

Guess what? Glowing watch dials have absolutely nothing to do with the lethal, crippling and killing radioactive uranium oxide gas used everywhere by Americans on battlefields in the last 15 years. And, that is the only place you will find this kind of uranium gas—in the air on battlefields.

Killing is all it is good for. Killing for an eternity. The US military uses millions of pounds of the weaponized version of it promiscuously in Iraq and Central Asia by order of senior American politicians.

That's a trick of the propagandists' art. See how easy you were to get off the track? Stay focused. These monsters are really good at diverting your attention. It's officially called "misdirection" in propaganda classes. The real subject is "ceramic uranium oxide gas" + battlefields. Remember!

When you talk to your neighbors tell them that is what all the fuss is about. Guarantee you, when your neighbor Googles it, they are going to find one of the 19 articles. In this case, being right is not a consolation prize. It just means more threats and harassment for authors who dare to write and speak about its use as a war crime.

Since 1943 American war planners have known "The amount necessary to cause death to a person inhaling the material is extremely small. It has been estimated that one millionth of a gram accumulating in a person's body would be fatal. There are no known methods of treatment for such a casualty." [9] This is from a Declassified document from the secretive [Manhattan Project](#).

I invite you to try an experiment. Spend a while contemplating the following two questions. Write to me with your conclusions. Send them to: bobnichols@cox.net

1. What kind of a person purposefully selects a genocidal weapon for use in Central Asia; then orders massive quantities of it used in battle.
2. What kind of person orders a government and military cover up of the resulting slow genocide?

The only statements throughout history that speak to the very issue we all face in the world today are these few sentences from the Nuremberg War Crimes Tribunal at the end of World War II.

"Individuals have international duties which transcend the national obligations of obedience . . . therefore have the duty to violate domestic laws to prevent crimes against peace and humanity from occurring."—Nuremberg War Crimes Tribunal, 1950

Since the obliging and compliant Congress will not stand up to the president as they are supposed to, we have a serious problem in this country.

I would not want any weak-minded souls to think I do not respect the processes of government created by the likes of Thomas Jefferson and his friends before 1776. Read *all* they wrote and said.

The Nuremberg statement is now international law and by extension, U.S. law. It is now the duty of all loyal American citizens that the fascist government controlling the United States and the US military can no longer be allowed to exist; it must be replaced. The world, and international law, holds all Americans accountable, and the price to pay is dear.

As you think about the "problem" we have in the United States I send you this greeting "Welcome to hell." The following sources were consulted for this article.

Listen to the former director of the Pentagon's Depleted Uranium Project Dr Doug Rokke Ph.D., former Nuclear Weapons Lab Scientist Leuren Moret, former Army Sgt Dennis Kyne, human rights and war crimes lawyer Karen Parker, Canadian nuclear celebrity Susan Riordan, well-known nuke power plant investigator Russell Hoffman and Project Censored Award Winning Writer Bob Nichols discuss these thought provoking questions and more on the following recent World Wide Talk Radio Program: Depleted Uranium: Cause and Effect 4 Hour Special on [The 'X' Zone Radio Show](#) and [TalkStar Radio Network](#)

1. Nichols, "[There Are No Words](#)"
2. Nichols, "[My God! My Country Is Using Poison Gas In Iraq](#)"
3. Russell Hoffman, "[Poison Fire, USA](#)"
4. Moret, [Depleted uranium: Dirty bombs, dirty missiles, dirty bullets](#)
5. [World Depleted Uranium Weapons Conference](#)
6. [International Criminal Tribunal for Afghanistan written opinion of Judge N. Bhagwat](#)
7. Gsponer and Hurni, "[Fourth Generation Nuclear Weapons: The Physical Principles Of Thermonuclear Explosives, Inertial Confinement Fusion, And The Quest For Fourth Generation Nuclear Weapons](#)"

8. Ingrid Cassel "[An Interview with Amy Worthington](#)" 5-15-2005

9. [Declassified documents, the Manhattan Project, 1943 Memo to Gen. Leslie Groves.](#)

10. Kissinger's quote regarding military men comes from Chapter 14, which extensively discusses Al Haig, Kissinger and other Nixon staff advisors' negotiations and differences over national security issues during the 1969-1974 period. The exact, direct quote marks begin with the word 'dumb' and terminates after the word 'used'.
